COMPANY REFERENCE – NEO INFRASTRUCTURE

The City of Busselton was recently involved in a multi-million dollar re-enhancement of Dunsborough foreshore through the Royalties for Regions program.

As a part of this revitalisation, extensive coastal works were required including the removal of old fill and spoil, the construction of a “Hidden” Sand Bag protective sea wall, installation of coastal drainage systems including a Gross Pollutant Trap and other significant earthworks in an environmentally sensitive area.

Neo Infrastructure carried out these works with great professionalism ensuring the project was a success. Through Mike’s attention to detail and sound business planning and knowledge, Neo Infrastructure were able to complete the works both on time and budget.

Based on the works undertaken at Dunsborough Foreshore, the City of Busselton would have no hesitation in recommending Neo Infrastructure for similar works and wishes them well with future endeavours.

Yours sincerely

Mike Archer

CHIEF EXECUTIVE OFFICER

CITY OF BUSSELTON.
